Ocean, NJ 07712

Subject: CONTRACT N62472-97-C-3170; REPAIRS TO RSTS FUEL SYSTEM

The Environmental Engineering Branch, Public Works Department, Naval Air Engineering Station would like to personally thank you, your staff and sub-contractors for the successful completion of the subject construction project. Although the performance period was very short and the difficulties many, your company worked diligently with the Navy to complete a fuel system that would be up and running before the December 22, 1998 compliance deadline. Extraordinary efforts by Mr. Don Landi, Mr. Frank Inman and others ensured that all problems encountered during construction were quickly corrected. Thank you for a job well done.

Sincerely,

Lucy S. Bottomley
LUCY S. BOTTOMLEY
Supervisory Environmental Engineer
Public Works Department
By direction of the
Commanding Officer
