Subject: Contract No DACA51-97-C-0013, ATCOM Renovations, Building 206, Fort Monmouth, New Jersey

Gentlemen,

Structural Concepts Inc. was the general contractor for Contract No. DACA51-97-C-0013. It was successfully executed under my supervision as the Resident Engineer and had a contract value of \$2.135 million dollars. The work consisted of the complete renovation and conversion of barracks into administrative office spaces in Building 206.

Structural Concepts Inc. acted in a professional and competent manner in completing this project. An above average construction contractor's performance rating has been forwarded for approval. Throughout the execution of the project, Structural Concepts Inc. was found to be capable, efficient and effective in the performance of their responsibilities as per the contract plans and specifications. They were committed to customer satisfaction and provided a product that met all contract requirements. Structural Concepts Inc. also performed their work with an exemplary safety program, and were nominated for a Contractor's Safety Award from the Office of the Chief of the U.S. Army Corps of Engineers. Additionally, they proved to be very capable of effectively managing multiple subcontractors. All negotiations for modifications and change orders were presented and resolved in good faith.

No reservations exist in recommending them for any future projects with any local, state or federal agencies. In the event you need additional information feel free to contact me at 732-532-6412.

Sincerely,

A handwritten signature in black ink, appearing to read "Steven A. Baker".

Steven A. Baker  
MAJ, EN  
Resident Engineer
